

Assignment 3

Topics : Messages

- Create a new custom message "Age.msg". The Age.msg file must contain this:

```
float32 years  
float32 months  
float32 days
```

Create a publisher to publish random data in this message. Now create a Node to subscribe to this data and change the years value in the message as 20 and republish to another topic. And finally a third node to subscribe to the new topic with modified Age.

Your Code:

- Create a launch file that launches the above three nodes

Your Code:
